## (54) SERIES DATA COMMUNICATION EQUIPMENT

## (57)Abstract:

**PURPOSE:** To lower the probability of an erroneous communication by completing a data transfer in CPUs or between each peripheral circuit thereof within a prescribed time.

**CONSTITUTION:** On a transmitting side, a transmitting interface 12 for transmitting N times transmitting data of the same frame as series data is provided, and on a receiving side, a receiving interface 21 for receiving the transmitted data, a receiving and analyzing block for analyzing normal received data from the received data of received N frames, and an abnormality processing block for executing an abnormality processing, when the normal received data cannot be analyzed are provided.

## LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's]
